Enhanced BLS CPR Training

Proven to Achieve Better Quality CPR

This is a high fidelity manikin with a life-like look and feel. It surpasses other systems in accuracy of measurement, feedback and reports on more parameters that matter to patients.

The Only System Giving Accurate Complete Feedback

This system offers real depth and simple to adjust chest resistance for more realistic practice. It detects leaning on the chest and is sensitive to movement away from the correct spot. Ventilations provide accurate display of volume and accurate real time display for rate as you provide air.

Easily Change Chest Resistance

With Advanced Simulations

Ventilation SIM
Improves use of the BVM. You see accurate flow of air with Volume and Rate as it moves into the lungs.

Hands-Off SIM
Responds to actual performance to show how you are influencing perfusion.

Note: Sold as Torso Manikin. Arms & Legs, and IV Training Arm available.
