

Thank you to IMSH for a warm welcome in San Antonio Texas.

The theme this year was Redefining & Redesigning. It was exciting to see SmartMan embraced with such enthusiasm by the Simulation experts.

Definitely our super high fidelity data from our proprietary sensors made an impact, after all how do you know if your Simulation Center is having an impact if you don't have the DATA!

We introduced eSERT (Enhanced System for Emergency Response Training, our Big Data Cloud App. We build the interface for you to answer your questions so that your data is immediately understandable. The graphs and tables show exactly what you want to know and at the same time you can drill down to know more.

Learn more about eSERT here.

High Fidelity Feedback Simulation
